CONTENTS

No. 1, January, 1954

Obituary: Norman MacLeod Harris. Chas. A. Mitchell 1
Obituary: Edwin George Hastings. W. C. Frazier 3
The Use of Metabolites in the Restoration of the Viability of Heat and Chemically Inactivated *Escherichia coli*. F. Heinmets, W. W. Taylor, and J. J. Lehman 5
The Morphology, Cell Structure, and Taxonomic Affinities of the Moraxella. R. G. E. Murray and J. P. Truant 13
Dependence of the Toxicity of Cations for Lactic Acid Bacteria on pH and Incubation Time. Robert A. MacLeod 23
Morphological and Biochemical Changes Induced by Copper in a Population of *Escherichia coli*. Lawrence L. Weed and Dorothy Longfellow 27
Comparative Metabolic Studies on the Genus *Brucella*. II. Metabolism of Amino Acids that Occur in the Urea Cycle. H. S. Cameron and Margaret E. Meyer 34
Relationship between Vitamin B_{12} Oxidation Product and Sodium Chloride Toxicity for Lactobacilli. David Hendlin and Jeanne C. Wall 38
The Cytology of *Micrococcus cryophilus*. K. A. Bisset 41
The Contribution of Protein from Parent to Progeny in T2 Coliphage. R. C. French. 45
Effect of Combinations of Antibiotics on Lysis of *Staphylococcus aureus* by Penicillin. William M. M. Kirby and James M. Burnell 50
Potentiation of Inhibitor Action Through Determination of Reversing Metabolites. Robert F. Pittillo and J. W. Foster 53
The Host-Parasite Relationship in Tularemia. I. A Study of the Influence of *Bacterium tularense* on the Amino Acid Metabolism of White Rats. John M. Woodward, Anthony J. Sbarra, and D. Frank Holtman 58
Metabolic Studies on Three Strains of Pleuropneumonia-like Organisms Isolated from Man. James G. Lecce and Harry E. Morton 62
Peptides and Bacterial Growth. VI. The Nutritional Requirements of *Lactobacillus delbrueckii*. Vincent J. Peters and Esmond E. Snell 69
Comparative Cytology of Wild Type Saccharomyces and a Respirationally Deficient Mutant. Philip E. Hartman and Charlotte Liu 77
The Fermentation of Galactose by *Streptococcus pyogenes*. R. H. Steele, A. G. C. White, and W. A. Pierce, Jr. 86
The Production of Acetylmethylcarbinol by Aerobacter from a Variety of Carbon Sources in a Synthetic Medium. Jerome J. Helprin and Michael X. Sullivan 90
Cell Division in *Micrococcus pyogenes* var. *aureus*. R. B. Webb and J. B. Clark 94
The Mechanism of Utilization of Thiomethyladenosine in the Biosynthesis of Methionine. Miriam Schwartz and Stanley K. Shapiro 98
A Screening Test of the Effect of Organic Compounds on Production of Tobacco Mosaic Virus. David E. Schlegel and T. E. Rawlins 103
On the Mode of Release of Tetanus Toxin from the Bacterial Cell. Joseph L. Stone .. 110
A Simple Blood Medium for Determining the Susceptibility of *Mycobacterium tuberculosis* to Isoniazid (Isonicotinic Acid Hydrazide). Maurice S. Tarshis 117
Notes:
The Effect of the Dose of Bacterial Polysaccharide Antigen on Antibody Production in Mice. Harold Baer, Joan Kemp Bringaze, and Mary McNamee 123
The Demonstration of Bacterial Capsules by Fontana's Staining Procedure. Louis Gerstley, III and Harry E. Morton 125
The Modifying Effect of Phenolized Saline on the Agglutination of a Strain of *Klebsiella pneumoniae*. Louise T. Adler and James C. Humphries 126
Induced Variation in the Specific Phase of *Salmonella litchfield*. D. W. Bruner 127

No. 2, February, 1954

The Growth of Pleuropneumonia-like Organisms of Human Origin: Cultivation in the Developing Chick Embryo and an *in vitro* Growth Cycle. Robert Keller and Harry E. Morton 129

An Approach to the Study of Interactive Phenomena among Microorganisms Indigenous to Man. Theodor Rosebury, David Gale, and Duane F. Taylor 135
Enzymology of Mycobacteria. VI. Enzymic Degradation of Guanidine Derivatives. E. A. Zeller, L. S. Van Orden, and W. F. Kirchheimer 153
Occurrence of Mucoid Variants of *Lactobacillus bifidus*. Demonstration of Extracellular and Intracellular Polysaccharide. Robert F. Norris, Margaret De Sipin, Frederick W. Zilliken, Thomas S. Harvey, and Paul György 159
The Depolymerization of Bacterial Polysaccharides by Hyaluronidase Preparations. George H. Warren and Jane Gray 167
The Lactic Dehydrogenase of *Penicillium chrysogenum*. L. E. Casida, Jr. and S. G. Knight 171
The Effect of Homologous Antibodies on the Process of Sporulation in a Mesophilic Organism. D. G. Lundgren 176
Threonine Synthase, a System Synthesizing L-Threonine from L-Homoserine. Georges N. Cohen and Marie-Louise Hirsch 182
The Effect of X Rays on the Macromolecular Organization of *Escherichia coli*. Daniel Billen and Elliot Volkin 191
Studies of Toxins of *Clostridium botulinum*. II. Immunization of Rabbits with an Atoxic Variant of *Clostridium botulinum*, Type C. Daniel A. Boroff and Helen Dale Cabeen 198
Studies on Lysogenesis. II. The Effect of Temperature on the Lysogenization of *Shigella dysenteriae* with Phage P1. G. Bertani and S. J. Nice 202
Isolation and Chemical Composition of the Membranes of an Insect Virus and Their Relation to the Virus and Polyhedral Bodies. G. H. Bergold and E. F. Wellington 210
The Vitamin Requirements of Certain Alpha-Hemolytic Streptococci Isolated from the Human Mouth. Thomas A. Nevin 217
Phage-Host Relationships in Nontoxigenic and Toxigenic Diphtheria Bacilli. W. Lane Barksdale and A. M. Pappenheimer, Jr. 220
Fixation of $C^{14}O_2$ into Nucleic Acid Constituents by *Brucella abortus*. Jack W. Newton, A. G. Marr, and J. B. Wilson 233
Relative Frequencies of Sectored and Nonsectored Mutant Colonies in Yeast as a Function of Ultraviolet Dose. Allen P. James 237
Bacteriophage Studies on the Hemorrhagic Septicemia Pasteurellae. David Rifkind and M. J. Pickett 243
The Detection Microscopically of Colonies of Shigella in Stool Cultures. Edward W. Walters, Merlin L. Cooper, and Helen M. Keller 247
Notes:
A Simple Medium for the Cultivation of Leptospira. Lief M. Ringen and Russell W. H. Gillespie 252
A Useful Bacterial Cell Wall Stain. R. B. Webb 252
Modifications of the Chemostat. Herbert E. Kubitschek 254

No. 3, March, 1954

The Effect of Cortisone and Streptomycin on Experimentally Induced Pulmonary Tuberculosis in Rabbits. Thomas E. Morgan, Sidney H. Wanzer, and David T. Smith 257
The Effect of Corticotropin (ACTH) and Streptomycin on Experimentally Induced Pulmonary Tuberculosis in Rabbits. Sidney H. Wanzer, Thomas E. Morgan, and David T. Smith 264
Variable Factors Influencing the Production of Tetanus Toxin. J. Howard Mueller and Pauline A. Miller 271
Studies on the Filamentous Sheathed Iron Bacterium *Sphaerotilus natans*. J. L. Stokes 278
Nuclear Apparatus of *Escherichia coli* after Fixation in Chromic Acid and Osmium Tetroxide. A. Guha, N. N. Dasgupta, and M. L. De 292
Intracellular Events Occurring During Endotrophic Sporulation in *Bacillus mycoides*. J. W. Foster and Jerome J. Perry 295
A Simple Technique for Obtaining Mating Types in Heterothallic Diploid Yeasts, with Special Reference to Their Use in the Genus *Hansenula*. Lynferd J. Wickerham and Kermit A. Burton 303

Studies on the Synthesis of Riboflavin by a Mutant Yeast, *Saccharomyces cerevisiae*. K. V. Giri and P. R. Krishnaswamy 309
On the Metabolism of an Amino Acid Fermenting Clostridium. Thressa C. Stadtman 314
Properties of the Penicillin Binding Component of *Micrococcus pyogenes*. J. W. Daniel, Jr. and Marvin J. Johnson 321
Muscle Extractives in the Production of Tetanus Toxin. Nusret H. Fisek, J. Howard Mueller, and Pauline A. Miller 329
Studies on the Formic Hydrogenlyase System of Bacteria. Herman C. Lichstein and Ruth B. Boyd 335
Observations on the Morphogenesis of *Arthrobacter citreus*, spec nov. L. E. Sacks 342
Studies on Group G of the Genus *Salmonella*. P. R. Edwards, Alma C. McWhorter, and Mary A. Fife 346
Growth of *Malleomyces pseudomallei* in Simple Chemically Defined Media. H. B. Levine, J. H. Dowling, Margery Evenson, and O. G. Lien, Jr. 350
Adaptation of Azotobacter Cells to Tricarboxylic Acid Substrates. Anna Marie Williams and P. W. Wilson 353
Growth and Mutation of Bacteria During Continuous Irradiation. B. A. Rubin 361
The Oxidative Dissimilation of Serine by *Pasteurella pestis*. H. B. Levine, R. Weimberg, J. H. Dowling, Margery Evenson, M. Rockenmacher, and H. Wolochow 369
Studies on Heat Resistance. VI. Effect of Temperature of Incubation at Which Formed on Heat Resistance of Aerobic Thermophilic Spores. O. B. Williams and W. J. Robertson 377

No. 4, April, 1954

Metabolic Reactions of *Pasteurella pestis*. I. Terminal Oxidation. Melvin Santer and Sam Ajl 379
Phosphorylation and Carbon Dioxide Fixation in the Autotrophic Bacterium, *Thiobacillus thiooxidans*. W. W. Umbreit 387
Studies on Cell Division. II. X-Radiation as a Division Inhibiting Agent. Edward Spoerl, L. E. Loveless, T. H. Weisman, and R. J. Balske 394
Partial Purification and Properties of Bacterial Luciferin and Luciferase. W. D. McElroy, J. W. Hastings, Valerie Sonnenfeld, and Jane Coulombre 402
The Oxidation of Acetate by *Micrococcus lysodeikticus*. Howard J. Saz and Lester O. Krampitz 409
Acetic Acid Oxidation by *Escherichia coli*: Evidence for the Occurrence of a Tricarboxylic Acid Cycle. H. Earle Swim and Lester O. Krampitz 419
Acetic Acid Oxidation by *Escherichia coli*: Quantitative Significance of the Tricarboxylic Acid Cycle. H. Earle Swim and Lester O. Krampitz 426
Germination of Clostridium Spores in Buffered Glucose. E. Staten Wynne, Donald A. Mehl, and William R. Schmieding 435
Studies on Immunization Against Plague. VI. Growth of *Pasteurella pestis* and the Production of the Envelope and Other Soluble Antigens in a Casein Hydrolyzate Mineral Glucose Medium. Ellis Englesberg and Judith Bentoff Levy 438
An Immunological Purification of Typhus Rickettsiae. Adele Karp 450
Intracellular Conjugation and Detoxification of Palmitic Acid by *Mycobacterium tuberculosis*. J. L. Karlsson 456
The Effect of Aureomycin and Terramycin on *Candida albicans* in the Fecal Microflora of Chicks and Turkey Poults. John McNeill Sieburth and Frank J. Roth, Jr. 460
Pantothenic Acid Conjugates and Growth of *Acetobacter suboxydans*. Gene M. Brown and Esmond E. Snell 465
A Mucoid Form of *Micrococcus pyogenes* var. *aureus* Which Shows Capsular Swelling with Specific Immune Serum. Katherine Mills Price and Yale Kneeland, Jr. 472
The Influence of Carbon Dioxide on Oxygen Uptake by "Resting Cells" of Bacteria. John O. Harris 476
Characteristic Growth Patterns of the Different Members of a Polyploid Series of Saccharomyces. G. Fred Townsend and Carl C. Lindegren 480

The Nutrition and Physiology of the Genus *Pediococcus*. Erling M. Jensen and Harry W. Seeley 484
The Influence of Iron or Manganese upon the Formation of Spores by Mesophilic Aerobes in Fluid Organic Media. Harold R. Curran and Fred R. Evans 489
A Cytological Study of *Nocardia corallina* and other Actinomycetes. R. B. Webb, J. Bennett Clark, and H. L. Chance 498
Notes:
Use of Glass Beads for the Mechanical Rupture of Microorganisms in Concentrated Suspensions. Carl Lamanna and M. Frank Mallette 503
An Influence of Carbon Source upon the Penicillin Sensitivity of *Escherichia coli* in Solid Medium. S. D. Wainwright and J. Mullaney 504
The Characteristics of *Clostridium thermocellum*. R. H. McBee 505

No. 5, May, 1954

The Assimilation of Glucose by Resting Cells of *Escherichia coli*. Paul H. Kopper 507
The Study of Factors which Influence Metabolic Reactivation of the Ultraviolet Inactivated *Escherichia coli*. F. Heinmets, J. J. Lehman, W. W. Taylor, and R. H. Kathan 511
The Influence of Amino Acids on Fructose Utilization in the Luminous Bacterium, *Achromobacter fischeri*. Stanley Friedman 523
Action of Chloramphenicol on T-1 Bacteriophage. I. Inhibition of Intracellular Multiplication. F. M. Bozeman, C. L. Wisseman, Jr., H. E. Hopps, and J. X. Danauskas 530
Antagonisms Among Enteric Pathogens and Coliform Bacteria. Max Levine and Ralph H. Tanimoto 537
A Strain of *Shigella dysenteriae* 1 Requiring Proline. Richard B. Johnson and Carl G. Mays 542
Comparison of Three Methods for the Determination of Coagulase Activity in Staphylococci. William E. Clapper and David C. Wood 545
Pyruvate Oxidation in *Desulphovibrio desulphuricans*. J. C. Sadana 547
The Biotin Requirement of *Micrococcus lysodeikticus*. G. E. Wessman, L. P. Allen, and C. H. Werkman 554
Diffusion-Precipitin Studies of the Complexity of Antigen Mixtures. I. The Nature of Bovine Antigens in Dick Toxin. Robert K. Jennings 559
Diffusion-Precipitin Studies of the Complexity of Antigen Mixtures. II. The Number of Zones Formed by One Antigen. Robert K. Jennings 565
Oxidative Assimilation by *Bacillus subtilis*. Burton Wilner and C. E. Clifton 571
Demonstration of Striated Fibers in the Capsule of the Lisbonne Strain of Lysogenic *Escherichia coli*. Louis W. Labaw and V. M. Mosley 576
Studies on the Spores of Aerobic Bacteria. III. The D-Amino Acid Content of Spores and Vegetative Cells of *Bacillus terminalis*. Norman L. Lawrence and H. Orin Halvorson 585
Effect of Carbohydrates on Some Myxobacteria. William Arthur Clark 589
The Influence of 2,4-Dinitrophenol on the Oxidation of Acetate and Succinate by *Escherichia coli*. C. R. Goucher, E. E. Woodside, and W. Kocholaty 593
The Nutritional Requirements of Treponemata. VI. The Total Vitamin Requirements of the Reiter Treponeme. Harry G. Steinman, Vance I. Oyama, and Henry O. Schulze 597
A Quantitative Gram Reaction. J. F. Barbaro and E. R. Kennedy 603
Anaerobic Fermentation of Lysine. Patricia M. Dohner and B. P. Cardon 608
Notes:
Attempts to Propagate Type 2 Lansing, Y-SK, and MEF$_1$ Strains of Poliomyelitis Virus in Neoplastic Mouse Tissue Cultures. Benjamin V. Siegel and Mary Jean Morse 612
Visibilizing Microorganisms on Membrane Filter Surface. Oscar W. Richards and Wilfred B. Krabek 613
The Growth of Tubercle Bacilli in Silicone Coated Glass Tubes. Myron W. Fisher 613
The Type of Lactic Acid Formed by Microbacterium. P. Arne Hansen 614

Manganese and the Proteolytic Activity of Spore Extracts of *Bacillus megaterium* in Relation to Germination. H. S. Levinson and M. G. Sevag 615
Existence of Haem Compounds in a Photosynthetic Obligate Anaerobe. M. D. Kamen and L. P. Vernon 617

No. 6, JUNE, 1954

Formation of Granular Structures by Leptospirae as Revealed by the Electron Microscope. J. W. Czekalowski and G. Eaves 619
Factors Determining the Viability of Selected Microorganisms in Inorganic Media. Shirley E. Gunter 628
The Role of Calcium in the Penetration of Bacteriophage T5 into Its Host. S. E. Luria and Doris L. Steiner 635
Infection by Bacteriophage T5 and Its Intracellular Growth—A Study by Complement Fixation. Yvonne Théry Lanni 640
Tracer Studies on Ornithine, Lysine, and Formate Metabolism in an Amino Acid Fermenting Clostridium. Thressa C. Stadtman and F. H. White, Jr. 651
The Oxidation of Tricarboxylic Acid Cycle Compounds by *Penicillium chrysogenum*. L. E. Casida, Jr. and S. G. Knight 658
Mode of Action of Chloramphenicol. I. Action of Chloramphenicol on Assimilation of Ammonia and on Synthesis of Proteins and Nucleic Acids in *Escherichia coli*. C. L. Wisseman, Jr., J. E. Smadel, F. E. Hahn, and H. E. Hopps 662
Mode of Action of Chloramphenicol. II. Inhibition of Bacterial D-Polypeptide Formation by an L-Stereoisomer of Chloramphenicol. F. E. Hahn, C. L. Wisseman, Jr., and H. E. Hopps 674
An Unidentified Growth Factor in the Nutrition of *Lactobacillus casei*. D. V. Rege and A. Sreenivasan 680
Effect of D-Amino Acids on Growth of Lactobacilli. Arthur E. Teeri 686
Crystal Violet Binding Capacity and the Gram Reaction of Bacterial Cells. J. W. Bartholomew and Harold Finkelstein 689
Pyrimidine Biosynthesis in *Aerobacter aerogenes*. Elaine V. Nelson and Stanley K. Shapiro 692
Studies on Lysogenesis. III. Superinfection of Lysogenic *Shigella dysenteriae* with Temperate Mutants of the Carried Phage. G. Bertani 696
A Procedure for Demonstrating the Presence of Carotenoid Pigments in Yeasts. W. J. Peterson, T. A. Bell, J. L. Etchells, and W. W. G. Smart, Jr. 708
Streptococcus thermophilus. M. L. Guss and E. A. Delwiche 714
The Effect of Irradiation with Ultraviolet Light on Various Properties of Typhus Rickettsiae. Emma G. Allen, Marianna R. Bovarnick, and John C. Snyder 718
Observations on the Hemolytic Properties of Typhus Rickettsiae. John C. Snyder, Marianna R. Bovarnick, Judith C. Miller, and R. Shih-Man Chang 724
Studies on the Metabolism of *Mycobacterium tuberculosis*. IV. The Effect of Fatty Acids on the Growth of *M. tuberculosis* var. *hominis*. Anne S. Youmans and Guy P. Youmans 731
Studies on the Metabolism of *Mycobacterium tuberculosis*. V. The Effect of Amino Acids on the Growth of *M. tuberculosis* var. *hominis*. Anne S. Youmans and Guy P. Youmans 734
Notes:
Provisional *Shigella boydii* Infections in Egyptian Children. Thomas M. Floyd 738
A Simple Motorized Device to Facilitate the Spreading of Inocula over Agar Plate Surfaces. Marshall L. Snyder and Cecil K. Claycomb 739
Sporulation Capacity of *Coccidioides immitis* Affected by Cultural Conditions. C. Ross Hampson 739
Index of Authors 741
Index of Subjects 745

INDEX OF SUBJECTS[1]

Acetate effect of 2,4-dinitrophenol on oxidation of, by *Escherichia coli*, 503
—, oxidation of, by *Escherichia coli*, 419
—, — —, — *Micrococcus lysodeikticus*, 409
Acetobacter pasteurianum, uptake of crystal violet by, 689
— *suboxydans*, effect of pantothenic acid conjugates on growth of, 465
Acetylmethylcarbinol, production of, by *Aerobacter* species, 90
Achromobacter fischeri, aldolase in, 523
— —, effect of amino acids on fructose utilization by, 523
— —, glucose-6-phosphate dehydrogenase in, 523
— —, hexokinase in, 523
— —, phosphoglucomutase in, 523
— —, phosphohexoseisomerase in, 523
— —, properties of purified luciferin and luciferase from, 402
— —, respiration of, 523
— —, triose phosphate dehydrogenase in, 523
— *perolens*, effect of CO_2 on oxygen uptake of, 476
Aconitase, presence of, in *Pasteurella pestis*, 379
Actathiazic acid, reversal of toxicity of, by biotin, 53
ACTH (corticotropin), effect of, on experimental tuberculosis in rabbits, 264
Actinomycetes, cytology of, 498
Adenine, effect of, on synthesis of riboflavin by *Saccharomyces cerevisiae*, 309
Aerobacter aerogenes, effect of CO_2 on oxygen uptake of, 476
— —, formic hydrogenlyase in, 335
— —, production of acetylmethylcarbinol by, 90
— —, pyrimidine biosynthesis in, 692
— *cloacae*, production of acetylmethylcarbinol by, 90
Agar plate surfaces, apparatus for spreading, 739
Agglutination, effect of phenolized saline on, of *Klebsiella pneumoniae*, 126
Agmatine, deamination of, by mycobacteria and corynebacteria, 153
Agrobacterium radiobacter, effect of CO_2 on oxygen uptake of, 476
Alanine, metabolism of, by brucellae, 34
Alcaligenes faecalis, effect of CO_2 on oxygen uptake of, 476
Aldolase in *Achromobacter fischeri*, 523
D-Amino acid content of spores and vegetative cells of *Bacillus terminalis*, 585
Amino acid fermenting clostridium, metabolism of, 314
— — metabolism of white rats, influence of *Pasteurella tularensis* on, 58
— acids, changes in, during sporulation in *Bacillus mycoides*, 295
D-Amino acids, effect of, on growth of lactobacilli, 686
Amino acids, effect of, on growth of *Mycobacterium tuberculosis*, 734
— —, effect of, on synthesis of riboflavin by *Saccharomyces cerevisiae*, 309
— —, effect of on utilization of fructose by *Achromobacter fischeri*, 523
— —, metabolism of, by a clostridium, 651
— —, metabolism of, by brucellae, 34
— —, requirements of *Shigella dysenteriae* for, 542
Ammonia, action of chloramphenicol on assimilation of, by *Escherichia coli*, 662
Antibodies, effect of, on sporulation in bacilli, 176
Antibody production in mice, effect of dose of bacterial polysaccharide antigen on, 123
Antigen, bacterial polysaccharide, effect of dose of, on antibody production in mice, 123
— mixtures, diffusion-precipitin studes of the complexity of, 559, 565
—, soluble, from *Pasteurella pestis*, 438
Antigens of Group G salmonellae, 346
Apparatus for spreading agar plate surfaces, 739
Arcaine, deamination of, by mycobacteria and corynebacteria, 153
Arthrobacter citreus, n. sp., morphogenesis of, 342
Asparagin, effect of, on growth of *Mycobacterium tuberculosis*, 734
Aspartic acid, effect of, on growth of *Mycobacterium tuberculosis*, 734
Assimilation, oxidative, by *Bacillus subtilis*, 571
Asterococcus mycoides, metabolism of, 62
Aureomycin, effect of, on *Candida albicans* in fecal flora of chicks and turkey poults, 460
—, reversal of toxicity of, by glycine, 53
Azotobacter agile, effect of CO_2 on oxygen uptake of, 476
— —, viability of, in inorganic media, 628
— *vinelandii*, adaptation of, to tricarboxylic acid substrates, 353

B C G strain of *Mycobacterium tuberculosis*, oxidation of palmitic acid by, 456
Bacillus brevis, effect of iron and manganese on formation of spores by, 489
— *cellulosae dissolvens*, synonym of *Clostridium thermocellum*, 505
— *cereus*, effect of antibodies on sporulation in, 176
— —, — — CO_2 on oxygen uptake of, 476
— *laterosporus*, effect of iron and manganese on formation of spores by, 489

[1] All entries indexed to first page of article.

Bacillus megaterium, germination of spores of, manganese and, 615
— *mycoides*, intracellular events occurring during sporulation in, 295
— *stearothermophilus*, heat resistance of spores of, 377
— *subtilis*, effect of CO_2 on oxygen uptake of, 476
— —, — — iron and manganese on formation of spores by, 489
— —, oxidative assimilation by, 571
— —, uptake of crystal violet by, 689
— *terminalis*, D-amino acid content of spores and vegetative cells of, 585
Bacteriophage, effect of temperature on lysis of *Shigella dysenteriae* by, 202
— studies on hemorrhagic septicemia pasteurellae, 243
—, superinfection of *Shigella dysenteriae* with mutants of, 696
—, T1, action of chloramphenicol on, 530
—, T2, contribution of protein from parent to progeny in, 45
—, T5, intracellular growth of, 635
—, —, penetration of, role of calcium, 635
Bacteriophages for toxic and nontoxic diphtheria bacilli, 220
Biotin, requirement of *Micrococcus lysodeikticus* for, 554
—, requirements of α-hemolytic streptococci for, 217
—, — — Reiter treponeme for, 597
—, reversal of toxicity of isonicotinic hydrazide and actathiazic acid by, 53
Brucella abortus, fixation of $C^{14}O_2$ into nucleic acids of, 233
— —, metabolism of amino acids by, 34
— *melitensis*, metabolism of amino acids by, 34
— *suis*, metabolism of amino acids by, 34

Calcium, role of, in penetration of bacteriophage, 635
Candida albicans, effect of aureomycin and terramycin on, in fecal flora of chicks and turkey poults, 460
— *pelliculosa*, mating type for *Hansenula anomala*, 303
Capric acid, effect of, on growth of *Mycobacterium tuberculosis*, 731
Caprylic acid, effect of, on growth of *Mycobacterium tuberculosis*, 731
Capsular swelling of a mucoid strain of *Micrococcus pyogenes* var. *aureus*, 472
Capsule of *Escherichia coli*, striated fibers in, 576
Capsules, bacterial, demonstration of, by Fontana's staining procedure, 125
Carbohydrates, effect of, on myxobacteria, 589
Carbon dioxide, effect of, on oxygen uptake of bacteria, 476
— — fixation and phosphorylation in *Thiobacillus thiooxidans*, 387
— — ($C^{14}O_2$), fixation of, into nucleic acids of *Brucella abortus*, 233
Carotenoid pigments in yeast, procedure for demonstrating, 708
Cations, toxicity of, for lactobacilli, 23
Cell division, effect of X-radiation on, 394
— — in *Micrococcus pyogenes* var. *aureus*, 94
— wall stain, 252
Cellulomonas biazotea, effect of CO_2 on oxygen uptake of, 476
— *rosea*, effect of CO_2 on oxygen uptake of, 476
Chemically inactivated *Escherichia coli*, restoration of viability of, 5
Chemostat, modifications of, 254
Chick embryo, cultivation of pleuropneumonia-like organisms in, 129
Chicks, effect of aureomycin and terramycin on *Candida albicans* in fecal flora of, 460
Children, infections with *Shigella boydii* in Egyptian, 738
Chloramphenicol, action of, on T1 bacteriophage, 530
—, mode of action of, 662, 674
—, L-stereoisomer of, inhibition of polypeptide formation in *Bacillus subtilis* by, 674
Chlorobium limicola, cytochrome-c oxidase in, 617
— —, cytochrome photooxidase in, 617
— —, existence of haem compounds in, 617
Chondrococcus species, effect of carbohydrates on, 589
Clostridium botulinum, germination of spores of, in buffered glucose, 435
— —, type C, atoxic variants of, 198
— *chauvei*, germination of spores of, in buffered glucose, 435
—, metabolism of an amino acid fermenting, 314
—, — — amino acids by, 651
— *perfringens*, germination of spores of, in buffered glucose, 435
— *tetani*, nutrition and toxin production by, 271, 329
— —, nutrition of, 329
— *thermocellum*, characteristics of, 505
Coagulase, methods for determining, in staphylococci, 545
Coccidioides immitis, sporulation capacity of, 739
Coliform bacteria and enteric pathogens, antagonisms among, 537
Copper, effect of, on morphology and biochemistry of *Escherichia coli*, 27
Corticotropin (ACTH) effect of, on experimental tuberculosis in rabbits, 264
Cortisone, effect of, on experimental tuberculosis in rabbits, 257

Corynebacteria, degradation of guanidine derivatives by, 153
Corynebacterium helvorum, effect of CO_2 on oxygen uptake of, 476
Crystal violet uptake by bacteria, 689
Cytochrome-c oxidase in *Chlorobium limicola*, 617
— photooxidase in *Chlorobium limicola*, 617
Cytology of *Micrococcus cryophilus*, 41
— — mutants of *Saccharomyces cerevisiae*, 77
— — *Nocardia corallina*, 498

Dehydrogenase, lactic, from *Penicillium chrysogenum*, 171
Desulphovibrio desulphuricans, oxidation of pyruvic acid by, 547
Dick toxin, nature of bovine antigens in, 559
Diffusion-precipitin studies of the complexity of antigen mixtures, 559, 565
Dihydrostreptomycin, reversal of toxicity of, by phenylalanine, 53
2,4-Dinitrophenol, effect of, on oxidation of acetate and succinate by *Escherichia coli*, 593
Diphosphopyridine nucleotide, requirement of, for light emission by luminous bacteria, 402
Diphtheria bacilli, phage-host relationships in, 220

Enteric pathogens and coliform bacteria, antagonisms among, 537
Escherichia coli, action of chloramphenicol on assimilation of ammonia by, 662
— —, — — — — protein synthesis by, 662
— —, assimilation of glucose by resting cells of, 507
— —, depolymerization of polysaccharide from, 167
— —, effect of carbon source on penicillin sensitivity of, 504
— —, — — copper on morphology and biochemistry of, 27
— —, — — 2,4-dinitrophenol on oxidation of acetate and succinate by, 593
— —, — — X-radiation on cell division of, 394
— —, — — X-rays on macromolecular organization of, 191
— —, factors influencing reactivation of ultraviolet inactivated, 511
— —, fermentation of lysine by, 608
— —, formic hydrogenlyase in, 335
— —, growth of, during continuous irradiation, 361
— —, nuclear apparatus of, 292
— —, oxidation of acetate by, 419, 426
— —, restoration of viability of heat and chemically inactivated, 5
— —, stimulation of growth of, by *Candida albicans*, 135
— —, striated fibers in capsule of, 576
— —, threonine synthase from, 182
— —, uptake of crystal violet by, 689
— —, viability of, in inorganic media, 628
— *freundii*, effect of CO_2 on oxygen uptake of, 476

Fatty acids, effect of, on growth of *Mycobacterium tuberculosis*, 731
Fibers, striated, in capsule of *Escherichia coli*, 576
Filters, membrane, visibilizing microorganisms on, 613
Flavin nucleotide, requirement of, for light emission by luminous bacteria, 402
Fontana's staining procedure, demonstration of bacterial capsules by, 125
Formic hydrogenlyase, studies on bacterial, 335
Fructose, utilization of, by *Achromobacter fischeri*, effect of amino acids on, 523

Galactose, fermentation of, by *Streptococcus pyogenes*, 86
Generation time of pleuropneumonia-like organisms, 129
Germination of spores of *Bacillus megaterium*, manganese and, 615
Glass beads, use of, for mechanical rupture of bacteria, 503
Glucose, assimilation of, by resting cells of *Escherichia coli*, 507
—-1-phosphate, effect of, on production of tobacco mosaic virus, 103
—6-phosphate dehydrogenase in *Achromobacter fischeri*, 523
Glutamate, oxidation of, by *Rickettsia mooseri*, 450
Glutamic acid, effect of, on growth of *Mycobacterium tuberculosis*, 734
— —, metabolism of, by brucellae, 34
Glycine, reversal of toxicity of aureomycin by, 53
Gram technique, a quantitative, 603
Granular structures in leptospirae, 619
Growth cycle of pleuropneumonia-like organisms, 129
— patterns of different members of a polyploid series of Saccharomyces, 480
Guanidine derivatives, enzymatic degradation of, by mycobacteria, 153
Guanine, effect of, on synthesis of riboflavin by *Saccharomyces cerevisiae*, 309

Haem compounds in *Chlorobium limicola*, 617
Hansenula anomala, mating types of, 303
— *schneggii*, mating type for *Hansenula anomala*, 303
Harris, Norman MacLeod, necrology of, 1
Hastings, Edwin George, necrology of, 3
Heat inactivated *Escherichia coli*, restoration of viability of, 5

Heat resistance of spores of *Bacillus stearothermophilus*, 377
Hemolytic properties of typhus rickettsiae, 724
Hexokinase in *Achromobacter fischeri*, 523
Homoserine, synthesis of threonine from, by *Escherichia coli*, 182
Host-parasite relationship in tularemia, 58
Hyaluronidase, depolymerization of bacterial polysaccharides by, 167
Hypoxanthine, effect of, on synthesis of riboflavin by *Saccharomyces cerevisiae*, 309

Immunization against plague, studies on, 438
Insect virus, isolation and chemical composition of membranes of, 210
Interactive phenomena among microorganisms indigenous to man, 185
Iron bacterium, characteristics of, 278
—, effect of, on formation of spores by bacilli, 489
Irradiation, mutation of *Escherichia coli* during continuous, 361
Isocitric acid dehydrogenase, presence of, in *Pasteurella pestis*, 379
— dehydrogenase, presence of, in *Penicillium chrysogenum*, 658
Isocytosine, effect of, on production of tobacco mosaic virus, 103
Isoniazid, susceptibility of *Mycobacterium tuberculosis* to, 117
Isonicotinic acid hydrazide, susceptibility of *Mycobacterium tuberculosis* to, 117
— hydrazide, reversal of toxicity of, by biotin, 53

Klebsiella pneumoniae, effect of phenolised saline on agglutination of, 126

Lactic acid, type of, formed by *Microbacterium thermosphactum*, 614
— dehydrogenase of *Penicillium chrysogenum*, 171
Lactobacillus arabinosus, effect of D-amino acids of growth of, 686
— —, toxicity of cations for, 23
— *bifidus*, occurrence of mucoid variants of, 159
— *casei*, effect of D-amino acids on growth of, 686
— —, unidentified growth factor for, 680
— *delbrueckii*, nutrition of, 69
— *fermenti*, effect of D-amino acids on growth of, 686
— *lactis*, relation between vitamin B_{12} and sodium chloride toxicity for, 38
— *leichmannii*, effect of D-amino acids on growth of, 686
— —, relation between vitamin B_{12} and sodium chloride toxicity for, 38
— *pentosus*, toxicity of cations for, 23
Leptospira Czekalowski, electron micrograph of, 619
— —, granular structures in, 619
— *icterohaemorrhagiae*, electron micrograph of, 619
— —, granular structures in, 619
—, medium for cultivation of, 252
Leuconostoc mesenteroides, toxicity of cations for, 23
Lithium, toxicity of, for lactobacilli, 23
Luciferase, properties of purified bacterial, 402
Luciferin, properties of purified bacterial, 402
Luminous bacteria, properties of purified luciferin and luciferase from, 402
— bacterium, effect of amino acids on fructose utilization by, 523
Lysine, fermentation of, by *Escherichia coli*, 608
—, metabolism of, by a clostridium, 651
Lysogenesis, effect of temperature on, 202
—, studies on, 696

Malic dehydrogenase, presence of, in *Penicillium chrysogenum*, 658
Malleomyces pseudomallei, nutrition of, 350
Manganese, effect of, on formation of spores by bacilli, 489
—, proteolytic activity spore extracts of *Bacillus megaterium* and, 615
Mating types in diploid yeasts, technique for obtaining, 303
Medium for cultivation of leptospira, 252
Membrane of an insect virus, isolation and chemical composition of, 210
Methionine, utilization of thiomethyladenosine in synthesis of, 98
6-Methyluracil, effect of, on production of tobacco mosaic virus, 103
Microbacterium thermosphactum, type of lactic acid formed by, 614
Micrococcus cryophilus, cytology of, 41
— *lysodeikticus*, biotin requirement of, 554
— —, oxidation of acetate by, 409
— *pyogenes*, penicillin binding component of, 321
— — var. *aureus*, cell division in, 94
— — — —, mucoid strain of, showing capsular swelling with immune serum, 472
— — — —, uptake of crystal violet by, 689
Millipore filters, visibilizing microorganisms on, 613
Morazella bovis, effect of CO_2 on oxygen uptake of, 476
— *lacunata*, taxonomy of, 13
— *liquefaciens*, taxonomy of, 13
— *lwoffi* var. *bacteroides*, taxonomy of, 13
— *non liquefaciens*, morphology of, 13
— *non liquefaciens*, taxonomy of, 13
— *pericardite*, taxonomy of, 13
Morphogenesis of *Arthrobacter citreus*, n. sp., 342

Mucoid variants of *Lactobacillus bifidus*, occurrence of, 159
Muscle extractives in production of tetanus toxin, 329
Mutant colonies in yeast, sectored and non-sectored, 237
Mutation of *Escherichia coli* during continuous irradiation, 361
Mycobacterium phlei, degradation of guanidine derivatives by, 153
— *smegmatis*, degradation of guanidine derivatives by, 153
— *tuberculosis*, cultivation of, in silicone coated tubes, 613
— —, effect of amino acids on growth of, 734
— —, — — fatty acids on growth of, 731
— —, oxidation of palmitic acid by, 456
— —, susceptibility of, to isoniazid, 117
— — var. *bovis*, experimental infections in rabbits with, 257, 264
Myxobacteria, effect of carbohydrates on, 589
Myxococcus fulvus, effect of carbohydrates on, 589
— *stipitatus*, effect of carbohydrates on, 589
— *virescens*, effect of carbohydrates on, 589

Necrology of Edwin George Hastings, 3
— — Norman MacLeod Harris, 1
Neisseria catarrhalis, uptake of crystal violet by, 689
— —, stimulation of growth of, by other microorganisms, 135
New species: *Arthrobacter citreus*, morphogenesis of, 342
Nicotinamide, requirements of α-hemolytic streptococci for, 217
Nicotinic acid, requirements of Reiter treponeme for, 597
Nocardia blackwelli cytology of, 498
— *corallina*, cytology of, 498
Nuclear apparatus of *Escherichia coli*, 292
Nucleic acids of *Brucella abortus*, fixation of $C^{14}O_2$ into, 233
Nutrition of α-hemolytic streptococci, 217
— — genus *Pediococcus*, 484
— — *Lactobacillus casei*, 680
— — — *delbrueckii*, 69
— — *Malleomyces pseudomallei*, 350
— — *Micrococcus lysodeikticus*, 554
— — Reiter treponeme, 597
— — *Shigella dysenteriae*, 542
— — *Streptococcus thermophilus*, 714

Obituary of Edwin George Hastings, 3
— — Norman MacLeod Harris, 1
Ornithine, metabolism of, by a clostridium, 651
Oxidative assimilation by *Bacillus subtilis*, 571
— dissimilation of serine by *Pasteurella pestis*, 369

Palmitic acid, oxidation of, by *Mycobacterium tuberculosis*, 456
Pantetheine, effect of, on growth of *Acetobacter suboxydans*, 465
Pantoic acid, effect of, on growth of *Acetobacter suboxydans*, 465
Pantothenic acid conjugates, effect of, on growth of *Acetobacter suboxydans*, 465
— —, requirements of α-hemolytic streptococci for, 217
— —, — — Reiter treponeme for, 597
Pantothenylcysteine, effect of, on growth of *Acetobacter suboxydans*, 465
Pantoyl lactone, effect of on growth of *Acetobacter suboxydans*, 465
Pasteurella haemolytica, bacteriophage studies on, 243
— *multocida*, bacteriophage studies on, 243
— —, effect of CO_2 on oxygen uptake of, 476
— *pestis*, metabolic reactions of, 379
— —, oxidative dissimilation of serine by, 369
— —, production of soluble antigens from, 438
— *tularensis*, influence of, on amino acid metabolism of white rats, 58
Pediococcus damnosus, nutrition of, 484
— *pentosaceus*, nutrition of, 484
Penicillin binding component of *Micrococcus pyogenes*, 321
—, effect of carbon source on sensitivity of *Escherichia coli* to, 504
—, — — combinations of antibiotics on lysis of *Staphylococcus aureus* by, 50
Penicillium chrysogenum, isocitric dehydrogenase in, 658
— —, lactic dehydrogenase of, 171
— —, malic dehydrogenase in, 658
— —, oxidation of tricarboxylic acid cycle compounds by, 658
Phenylalanine, reversal of toxicity of dihydrostreptomycin and tyrosine by, 53
Phosphoglucomutase in *Achromobacter fischeri*, 523
Phosphohexoseisomerase in *Achromobacter fischeri*, 523
4'-Phosphopantetheine, effect of, on growth of *Acetobacter suboxydans*, 465
4'-Phosphopantothenic acid, effect of, on growth of *Acetobacter suboxydans*, 465
Phosphorylation and carbon dioxide fixation in *Thiobacillus thiooxidans*, 387
Plague, immunization against, 438
Plectridium snieszkoi, synonym of *Clostridium thermocellum*, 505

Pleuropneumonia-like organisms, cultivation of in chick embryo, 129
— —, growth cycle of, 129
— —, metabolism of, 62
Poliomyelitis virus, cultivation of, in neoplastic mouse tissue culture, 612
Polyhedral bodies and an insect virus, 210
Polypeptide formation by *Bacillus subtilis*, inhibition of, by L-stereoisomer of chloramphenicol, 674
Polysaccharide from *Lactobacillus bifidus*, 159
Polysaccharides, bacterial, depolymerization of, by hyaluronidase, 167
Proline, a strain of *Shigella dysenteriae* requiring, 542
Propyl thiouracil, effect of, on production of tobacco mosaic virus, 103
Protein, action of chloramphenicol on synthesis of, by *Escherichia coli*, 662
Proteus vulgaris, depolymerization of polysaccharide from, 167
— —, formic hydrogenlyase in, 335
Pseudomonas aeruginosa, depolymerization of polysaccharide from, 167
— *fluorescens*, viability of, in inorganic media, 628
— *fragi*, effect of CO_2 on oxygen uptake of, 476
Purines, changes in, during sporulation in *Bacillus mycoides*, 295
—, effect of, on synthesis of riboflavin by *Saccharomyces cerevisiae*, 309
Pyridoxine, requirements of α-hemolytic streptococci for, 217
Pyrimidine biosynthesis in *Aerobacter aerogenes*, 602
Pyrimidines, changes in, during sporulation in *Bacillus mycoides*, 295
—, effect of, on synthesis of riboflavin by *Saccharomyces cerevisiae*, 309
Pyruvic acid, oxidation of, by *Desulphovibrio desulphuricans*, 547

Rabbits, experimental tuberculosis in, 257, 264
Reiter treponeme, vitamin requirements of, 597
Respiration of *Achromobacter fischeri*, 523
Rhizobium leguminosarum, effect of CO_2 on oxygen uptake of, 476
— *meliloti*, effect of CO_2 on oxygen uptake of, 476
— *trifolii*, effect of CO_2 on oxygen uptake of, 476
Rhodopseudomonas spheroides, viability of, in inorganic media, 628
Rhodotorula aurantiaca, carotenoid pigments in, 708
— *bronchialis*, carotenoid pigments in, 708
— *flava*, carotenoid pigments in, 708
— *glutinis*, carotenoid pigments in, 708
— *longissima*, carotenoid pigments in, 708
— *minuta*, carotenoid pigments in, 708
— *mucilaginosa*, carotenoid pigments in, 708
— *rubra*, carotenoid pigments in, 708
— *sanniei*, carotenoid pigments in, 708
Riboflavin, requirements of α-hemolytic streptococci for, 217
— synthesis of, by *Saccharomyces cerevisiae*, 309
Rickettsia mooseri, immunological purification of, 450
— —, oxidation of glutamate by, 450
Rickettsiae, effect of ultraviolet on properties of typhus, 718
—, hemolytic properties of typhus, 724
Rupture of bacteria, use of glass beads for mechanical, 503

Saccharomyces cerevisiae, cytology of mutants of, 77
— —, effect of X-radiation on cell division of, 394
— —, growth patterns of different members of a polyploid series of, 480
— —, sectored and nonsectored mutant colonies in, 237
— —, synthesis of riboflavin by, 309
— —, uptake of crystal violet by, 689
— —, viability of, in inorganic media, 628
Salmonella atlanta, antigens of, 346
— *litchfield*, induced variation in, 127
— *mississippi*, antigens of, 346
— species, antagonism of *Escherichia* species for, 537
—, studies on Group G of, 346
— *wichita*, antigens of, 346
Sarcina flava, effect of CO_2 on oxygen uptake of, 476
— *lutea*, depolymerization of polysaccharide from, 167
— —, uptake of crystal violet by, 689
Serine, oxidative dissimilation of, by *Pasteurella pestis*, 369
Serratia marcescens, depolymerization of polysaccharide from, 167
— —, effect of CO_2 on oxygen uptake of, 476
— —, uptake of crystal violet by, 689
Shigella boydii infections in Egyptian children, 738
— colonies, detection microscopically of, 247
— *dysenteriae*, a strain of, requiring proline, 542
— —, effect of temperature on lysis of, by phage, 202
— —, superinfection of, with mutant bacteriophages, 606
— species, antagonism of *Escherichia* species for, 537
Silicone coated tubes, cultivation of tubercle bacilli in, 613
Sodium chloride, relation between toxicity of, and vitamin B_{12}, for lactobacilli, 38
Sphaerotilus natans, characteristics of, 278
— —, morphology of, 278

Spores, *Bacillus terminalis*, D-amino acid content, of 585
—, germination of clostridial, in buffered glucose, 435
— of *Bacillus stearothermophilus*, heat resistance of, 377
Sporulation capacity of *Coccidioides immitis*, 739
—, effect of antibodies on, in bacilli, 176
— in *Bacillus mycoides*, intracellular events occurring during, 295
Stain for bacterial cell walls, 252
Staphylococci, methods for determining coagulase in, 545
Staphylococcus aureus, effect of combinations of antibiotics on lysis of, by penicillin, 50
"Stickland" reaction, occurrence of, in an amino acid fermenting clostridium, 314
Stool cultures, microscopic detection of colonies of shigella from, 247
Streptococcal erythrogenic toxin, nature of, 559
Streptococci, vitamin requirements of α-hemolytic, 217
Streptococcus-effector system and interactive phenomena among microorganisms, 135
Streptococcus faecalis, effect of CO_2 on oxygen uptake of, 476
— —, vitamin requirements of, 217
— *mitis*, vitamin requirements of, 217
— *pyogenes*, fermentation of galactose by, 86
— *salivarius*, vitamin requirements of, 217
— *thermophilus*, characteristics of, 714
Streptomyces griseus, cytology of, 498
Streptomycin, effect of, on experimental tuberculosis in rabbits, 257, 264
Succinate, effect of 2,4-dinitrophenol on oxidation of, by *Escherichia coli*, 593

T2 coliphage, contribution of protein from parent to progeny in, 45
Taxonomy of genus *Moraxella*, 13
Terminosporus thermocellulolyticus, synonym of *Clostridium thermocellum*, 505
Terramycin, effect of, on *Candida albicans* in fecal flora of chicks and turkey poults, 460
Tetanus toxin, factors influencing production of, 271
— —, mode of release of, from the bacterial cell, 110
— —, muscle extractives in production of, 329
Thiamin, requirements of α-hemolytic streptococci for, 217
—, — — Reiter treponeme for, 597
Thiobacillus thiooxidans, phosphorylation and carbon dioxide fixation in, 387
Thiomethyladenosine, utilization of, in synthesis of methionine, 98
Threonine synthase, from *Escherichia coli*, 182
—, synthesis of, from homoserine, by *Escherichia coli*, 182
Thymine, effect of, on synthesis of riboflavin by *Saccharomyces cerevisiae*, 309
Tobacco mosaic virus, effect of organic compounds on production of, 103
Toxin, Dick, nature of bovine antigens in, 559
—, tetanus, factors influencing production of, 271
—, —, mode of release of, from the bacterial cell, 110
—, —, muscle extractives in production of, 329
Toxins of *Clostridium botulinum*, 198
Treponeme, Reiter, vitamin requirements of, 597
Tricarboxylic acid cycle, occurrence of, in *Escherichia coli*, 419, 426
— — substrates, adaptation of *Azotobacter vinelandii* to, 353
Triose phosphate dehydrogenase in *Achromobacter fischeri*, 523
Tubercle bacilli, cultivation of, in silicone coated tubes, 613
Tuberculosis in rabbits, experimental, effect of cortisone on, 257
— — —, —, — — streptomycin on, 257, 264
Turkey poults, effect of aureomycin and terramycin on *Candida albicans* in fecal flora of, 460
Typhus rickettsiae, effect of ultraviolet on properties of, 718
— —, hemolytic properties of, 724
— —, immunological purification of, 450

Ultraviolet dose and frequencies of sectored and nonsectored mutant colonies in yeast, 237
— inactivated *Escherichia coli*, factors influencing reactivation of, 511
— light, effect of, on typhus rickettsiae, 718
Uracil, effect of, on synthesis of riboflavin by *Saccharomyces cerevisiae*, 309

Variants, atoxic, of *Clostridium botulinum*, type C, 198
—, mucoid, of *Lactobacillus bifidus*, occurrence of, 159
Variation, induced, in *Salmonella litchfield*, 127
Viability of microorganisms in inorganic media, 628
Vibrio comma, depolymerization of polysaccharide from, 167
Virus, poliomyelitis, cultivation of, in neoplastic mouse tissue culture, 612
Vitamin B_{12}, relation between, and sodium chloride toxicity for lactobacilli, 38
— requirements of α-hemolytic streptococci, 217
— — — Reiter treponeme, 597

X-radiation, effect of, on cell division, 394
X-rays, effect of, on macromolecular organization of *Escherichia coli*, 191

Xanthine, effect of, on synthesis of riboflavin by *Saccharomyces cerevisiae*, 309
Xanthomonas campestris, effect of CO_2 on oxygen uptake of, 476

Yeast, effect of X-radiation on cell division of, 394
—, growth patterns of different members of a polyploid series of, 480
—, procedure for demonstrating carotenoid pigments in, 708
—, sectored and nonsectored mutant colonies in, 237
Yeasts, technique for obtaining mating types in, 303

Zinc, toxicity of, for lactobacilli, 23

JOURNAL

OF

BACTERIOLOGY

VOLUME 68

BALTIMORE, MD.
1954

CONTENTS

No. 1, JULY, 1954

Microbial Metabolism of Carbamates. I. Isolation of *Streptomyces nitrificans*, n. sp., and Other Organisms Which Grow on Urethan. Albert Schatz, Henry D. Isenberg, Alfred A. Angrist, and Vivian Schatz 1
Microbial Metabolism of Carbamates. II. Nitrification of Urethan by *Streptomyces nitrificans*. Henry D. Isenberg, Albert Schatz, Alfred A. Angrist, Vivian Schatz, and Gilbert S. Trelawny 5
Suppression of Certain Viral Lesions by a Microbial Product, Xerosin, Lacking in Demonstrable Antiviral Properties and Produced by *Achromobacter xerosis*, n. sp. Vincent Groupé, Leonora H. Pugh, Alvin S. Levine, and Ernest C. Herrmann, Jr. 10
Enzymatic Breakdown of Citrate in the Absence of Coenzyme A. Robert W. Wheat, Donald T. O. Wong, and Samuel J. Ajl 19
Utilization of Fatty Acids by and Lipolytic Activities of *Mucor mucedo*. A. M. Stern, Z. John Ordal, and H. O. Halvorson 24
Determination of Carbon Assimilation Patterns of Yeasts by Replica Plating. Moshe Shifrine, H. J. Phaff, and A. L. Demain 28
Abortive Infection of a Strain of *Escherichia coli* by Coliphage T2. Samson R. Gross 36
Nutritional Requirements for the Reproduction of Coliphage T2 in a Strain of *Escherichia coli*. Samson R. Gross 43
Study of Paracolon Organisms with the Major Antigen of *Shigella sonnei*, Form I. Ekkehard E. Schmid, T. Velaudapillai, and G. R. Niles 50
Reduction of Nitrate with Molecular Hydrogen by *Proteus vulgaris*. Alvin I. Krasna and D. Rittenberg 53
Production of *Pasteurella pestis* Toxin. Ellis Englesberg and Judith Bentoff Levy 57
The Production of Hydrogen Peroxide by an Obligate Anaerobe, *Clostridium kluyveri*. Irving Lieberman and H. A. Barker 61
Speciation within the Genus *Brucella*. III. Nitrate Reduction and Nitrite Toxicity Tests. M. J. Pickett and E. L. Nelson 63
Purification and Properties of Bacterial Urease. A. D. Larson and R. E. Kallio 67
Carbon Dioxide Requirements and Nucleic Acid Synthesis by *Brucella abortus*. J. W. Newton and J. B. Wilson 74
Evidence for Alternate Pathways for the Oxidation of Glucose by *Pseudomonas aeruginosa*. C. A. Claridge and C. H. Werkman 77
The Induction of Thymine Synthesis by T2 Infection of a Thymine Requiring Mutant of *Escherichia coli*. Hazel D. Barner and Seymour S. Cohen 80
The Reversion of the L Form of *Proteus mirabilis* into the Rod Form. M. A. Medill and W. G. Hutchinson 89
Phosphorylation and Chemosynthesis by *Thiobacillus thiooxidans*. R. W. Newburgh 93
Isoglutamine and the Growth of *Lactobacillus arabinosus*. Milton Silverman, Marjorie K. Romine, and Floyd S. Daft 98
Effects of Potassium and Sodium in Microbiological Assay Media. R. J. Sirny, O. R. Braekkan, M. Klungsøyr, and C. A. Elvehjem 103
The Oxidation of Glucose and Acetate by *Saccharomyces cerevisiae*. Norman R. Eaton and Harold P. Klein 110
Studies on the Virulence of a Naturally Occurring Mutant of *Salmonella typhosa*. Samuel B. Formal, L. S. Baron, and Walter Spilman 117
Photodynamic Inactivation of Bacteriophage. James N. Welsh and Mark H. Adams 122
Notes:
Specific 5′-Nucleotidase from a Soil Bacterium. T. P. Wang 128
Ammonium Dehydrogenase. R. E. Klausmeier and R. C. Bard 129
The Agglutination of Ion Exchange Resin Particles Coated with Polysaccharide. E. Edwards Evans and Richard F. Haines 130
Biotin and Succinate Decarboxylation. E. H. Chambers and E. A. Delwiche 131

No. 2, August, 1954

Obituary—Harry Luman Russell. E. B. Fred 133
Polysaccharide Synthesis by a Variant of *Leuconostoc dextranicum*. Virginia Whiteside-Carlson, Louis V. Farina, and Warner W. Carlson 135
The Influence of the Environment on Acetate Metabolism in *Escherichia coli*. H. Edwin Umbarger 140
Adaptive Control of Terminal Respiration in *Pasteurella pestis*. Ellis Englesberg, Ahron Gibor, and Judith Bentoff Levy 146
The Inhibition of Bacterial Growth with 5-Methyltryptophan. Ernest Beerstecher, Jr. 152
Environmental Factors Influencing the Occurrence of *Histoplasma capsulatum* and *Microsporum gypseum* in Soil. L. D. Zeidberg and Libero Ajello 156
The Use of Filter Paper Chromatograms to Demonstrate Antigen-Antibody Reactions. Donald H. Spalding and T. G. Metcalf 160
Characteristics of a Cobalt Tolerant Culture of *Saccharomyces cerevisiae*. D. Perlman and E. O'Brien 167
Lysozyme and Morphological Alterations Induced in *Micrococcus lysodeikticus*. E. A. Grula and S. E. Hartsell 171
Some Enzymatic Changes Accompanying the Shift from Anaerobiosis to Aerobiosis in *Pasteurella pestis*. Ellis Englesberg, Judith Bentoff Levy, and Ahron Gibor 178
Studies on the Relationship of Potassium to Metabolism and Purine Biosynthesis in *Escherichia coli*. Samuel Friedman and Charles L. Fox, Jr. 186
Studies on a Strain of Caulobacter from Water. I. Isolation and Identification as *Caulobacter vibrioides* Henrici and Johnson with Emended Description. Landon E. Bowers, R. H. Weaver, Edward A. Grula, and O. F. Edwards 194
Studies on a Strain of Caulobacter from Water. II. Nutrition, with Implications for Cytology. Edward A. Grula, R. H. Weaver, and O. F. Edwards 201
A New Broth for the Serological Identification of Beta Hemolytic Streptococci. Kenzo Kuroda and Harry A. Feldman 207
Monochromatic Ultraviolet Action Spectra and Quantum Yields for Inactivation of T1 and T2 *Escherichia coli* Bacteriophages. M. R. Zelle and Alexander Hollaender 210
Tracer Experiments on the Mechanism of Acetate Formation from Carbon Dioxide by *Butyribacterium rettgeri*. Leo Pine and H. A. Barker 216
Metabolism of Glucose by *Butyribacterium rettgeri*. Leo Pine, Victoria Haas, and H. A. Barker 227
The Utilization of Carbon Compounds by Nocardia Species. Norvel M. McClung 231
Direct Staining of the Two Types of Nucleoproteins in *Escherichia coli*. Philip E. Hartman and John I. Payne 237
The Biosynthesis of Chloramphenicol. I. Precursors Stimulating the Synthesis. David Gottlieb, H. E. Carter, Marvin Legator, and Virginia Gallicchio 243
A Triphosphopyridine Nucleotide Dependent Alcohol Dehydrogenase from *Leuconostoc mesenteroides*. R. D. DeMoss 252
Notes:
A Versatile Medium for the Cultivation of *Erysipelothrix rhusiopathiae*. Loyd W. Tiffany and Robert B. Wheaton 258
A Simple Method for Isolating Individual Microbes. Joshua Lederberg 258
An Induced 6,8 Form from *Salmonella papuana*. D. W. Bruner 259

No. 3, September, 1954

A Study of the Sporulation of *Histoplasma capsulatum*. Gordon E. Nielsen and Robert E. Evans 261
On the Role of the Inducer in the Synthesis of Maltase in Yeast. S. Spiegelman and Harlyn O. Halvorson 265
The Effect of the Host on the Properties and Sensitivity of a Bacterial Virus. Murray Friedman 274

The Response of Certain Acetobacter Species to the Lactone Moiety of Pantothenic Acid. A. N. Hall, C. Russell, and K. S. Tiwari 279
Carbon Dioxide Requirement of Group F and Minute Colony G Hemolytic Streptococci. Pinghui Liu 282
The Effect of Some Sulfur Containing Compounds on Nitrogen Assimilation by a Strain of *Pseudomonas aeruginosa*. William E. DeTurk 289
Methionine Biosynthesis in *Escherichia coli*. Edwin B. Kalan and Joseph Ceithaml 293
Effects of Ionic Concentration on Growth of Bacteria. John J. Corbett 299
Lysozyme Action and its Relation to the Nakamura Effect. E. A. Grula and S. E. Hartsell 302
Production of Glutamyl Polypeptide by *Bacillus subtilis*. Curtis B. Thorne, Carmen G. Gómez, Howard E. Noyes, and Riley D. Housewright 307
The Isolation and Characterization of Bacteriophage Active Against the Diphtheria-Like Corynebacteria. Dexter H. Howard and Gregory J. Jann 316
Classification of Bacterial Viruses: The Relationship of Two Serratia Phages to Coli Dysentery Phages T3, T7, and D44. Mark H. Adams and Evelyn Wade 320
The Flavobacteria. I. Nutritional Requirements. Herbert N. Prince, Earl S. Beck, Robert C. Cleverdon, and Walter L. Kulp 326
β-Keto Acid Formation and Decomposition by Preparations of *Clostridium kluyveri*. Irving Lieberman and H. A. Barker 329
Studies on the Spores of Aerobic Bacteria. IV. A Heat Resistant Catalase from Spores of *Bacillus terminalis*. Norman L. Lawrence and H. Orin Halvorson 334
Effects of Carbohydrates, Proteins, and Bacterial Cells in the Heating Media on the Heat Resistance of *Clostridium sporogenes*. Mikio Amaha and Kin-Ichiro Sakaguchi 338
Aeration Requirements for the Growth of Aerobic Microorganisms. Charles G. Smith and Marvin J. Johnson 346
Hydrogenase and Hydrogen Metabolism in *Micrococcus aerogenes*. Waldo Curtis and E. J. Ordal 351
Effect of Manganese and Other Factors on Early Autolysis of Cultures of *Streptococcus faecalis*. J. van Eys and W. N. Pearson 362
Observations on Maltose Oxidation by *Acetobacter melanogenum*. H. Katznelson and S. W. Tanenbaum 368
Exposure of Microorganisms to Measured Sound Fields. Helen Kinsloe, Eugene Ackerman, and J. J. Reid 373
Studies with Three Bacterial Sucrose Phosphorylases. R. Weimberg and M. Doudoroff 381
Notes:
A New Method of Staining Spores of *Streptomycetaceae*. Gianfranco Corti 389
Growth Requirements for a Penicillin Sensitive *Sarcina lutea*. J. W. Brown and S. B. Binkley 390
A Simple Screening Test for Genetic Studies of Respiration Deficiency in Yeast. Maurice Ogur, Gertrude Lindegren, and Carl C. Lindegren 391

No. 4, October, 1954

Studies on Spore Germination: Its Independence from Alanine Racemase Activity. Brooks D. Church, Harlyn Halvorson, and H. Orin Halvorson 393
Characterization of an Orotic Acid Fermenting Bacterium, *Zymobacterium oroticum*, Nov. Gen., Nov. Spec. J. T. Wachsman and H. A. Barker 400
Studies on the Metabolism of *Mycobacterium tuberculosis*. VI. The Effect of Krebs' Tricarboxylic Acid Cycle Intermediates and Precursors on the Growth and Respiration of *Mycobacterium tuberculosis*. Nelda B. Holmgren, Irving Millman, and Guy P. Youmans 405
Studies on the Metabolism of *Mycobacterium tuberculosis*. VII. Terminal Respiratory Activity of an Avirulent Strain of *Mycobacterium tuberculosis*. Irving Millman and Guy P. Youmans 411

On the Origin of the Carbon in the Induced Synthesis β-Galactosidase in *Escherichia coli*. B. Rotman and S. Spiegelman 419
A Specific Reversible Inhibition of Bacteriophage T2. Bernard P. Sagik 430
Metabolic Patterns of Nutritionally Differentiated Cell Types of *Bacillus subtilis*. N. D. Gary, R. E. Klausmeier, and R. C. Bard 437
A Chemically Defined Medium for the Growth of *Cephalosporium salmosynnematum*. Michael A. Pisano, Birger H. Olson, and Charles L. San Clemente 444
Volutin Production in *Aerobacter aerogenes* Due to Nutrient Imbalance. Isabel W. Smith, J. F. Wilkinson, and J. P. Duguid 450
The Duplication of Bacterial Chromatin. Interpretations of some Cytological and Chemical Studies of the Germinating Spores of *Bacillus cereus* and *Bacillus megaterium*. P. C. Fitz-James 464
Studies on Immunity in Anthrax. IV. Factors Influencing Elaboration of the Protective Antigen of *Bacillus anthracis* in Clinically Defined Media. Milton Puziss and George G. Wright 474
Quantification of the Feulgen Reaction in Bacteria. N. C. Dondero, H. I. Adler, and M. R. Zelle 483
Studies on the Metabolism of the Treponemata. I. Amino Acid Metabolism. Stanley Barban 493
Intracellular Structures in *Caulobacter vibrioides*. E. A. Grula and S. E. Hartsell 498
Notes:
Citrate Metabolism and Cell Permeability. E. C. Foulkes 505
The Growth of an "Obligate" Thermophilic Bacterium at 36 C. L. Leon Campbell, Jr. 505
Change in Bacterial Morphology as a Result of Low Concentrations of Streptomycin. Herbert S. Goldberg and Billie S. Morgan 507

No. 5, NOVEMBER, 1954

The Cytological Basis for the Role of the Primary Dye in the Gram Stain. Carl Lamanna and M. F. Mellette 509
The Nucleus of Saccharomyces: A Cytological Study of a Frozen-Dried Polyploid Series. Balaji D. Mundkur 514
A Synthetic Medium for the L-Type Colonies of Proteus. M. A. Medill and D. J. O'Kane 530
Some Factors Affecting the Excretion of Orotic Acid by Mutants of *Aerobacter aerogenes*. Marcus S. Brooke, Daizo Ushiba, and Boris Magasanik 534
Potential Infectious Hazards of Laboratory Techniques. I. Lyophilization. Morton Reitman, Marcus L. Moss, John Bruce Harstad, Robert L. Alg, and Noel H. Gross 541
Potential Infectious Hazards of Laboratory Techniques. II. The Handling of Lyophilized Cultures. Morton Reitman, Marcus L. Moss, John Bruce Harstad, Robert L. Alg, and Noel H. Gross 545
Potential Infectious Hazards of Laboratory Techniques. III. Viral Techniques. Morton Reitman, Robert L. Alg, William S. Miller, and Noel H. Gross 549
Succinic Dehydrogenase of *Azotobacter vinelandii*. R. Repaske 555
The Nature of the Effect of α-Alanine on Population Changes of Brucella. Leonard A. Mika, Werner Braun, Edward Ciaccio, and Robert J. Goodlow 562
Pantothenic Acid Synthesis by Smooth *Brucella abortus*. Robert A. Altenbern and Herbert S. Ginoza 570
The Absence of a Tryptophan-Niacin Relationship in *Escherichia coli* and *Bacillus subtilis*. Charles Yanofsky 577
Studies on the Aerobic Oxidation of Fatty Acids by Bacteria. IV. The Effect of 2,4,6-Trichlorophenol on the Oxidation of Caprate and its Derivatives by *Serratia marcescens*. Jack M. Waltman and Sydney C. Rittenberg 585
Studies on the Methane Bacteria. XI. Fixation of Atmospheric Nitrogen by *Methanobacterium omelianskii*. Martin J. Pine and H. A. Barker 589

Induced Metabolic Mutants of *Mycobacterium tuberculosis*. J. L. Karlsson 592
A Clarification of the Relationship of *Candida guilliermondii* to Other Yeasts by a Study of their Mating Types. Lynferd J. Wickerham and Kermit A. Burton 594
The Mechanism of Allantoin Degradation by a Pseudomonas. L. Leon Campbell, Jr. 598
Factors Influencing the Growth of *Shigella dysenteriae* 1 in a Synthetic Medium. Richard B. Johnson 604
The Multiple Mechanisms of Penicillin Resistance. Harry Eagle 610
The Amino Acid Requirements of Penicillin Resistant and Penicillin Sensitive Strains of *Micrococcus pyogenes*. Amedeo Bondi, Joan Kornblum, and Margaret de St. Phalle 617
Comparative Study of the Antibacterial Properties of Ascorbic Acid and Reductogenic Compounds. Quentin N. Myrvik and Wesley A. Volk 622
A Lipoprotein as a Growth Factor for Certain Pleuropneumonialike Organisms. Paul F. Smith, James G. Lecce, and Raymond J. Lynn 627
Note:
The Isolation of *Listeria monocytogenes* from the Bovine Cervix. M. L. Gray and D. H. McWade 634

No. 6, DECEMBER, 1954

A Survey of Effects of Chemicals on Division and Growth of Yeast and *Escherichia coli*. L. E. Loveless, Edward Spoerl, and T. H. Weisman 637
Studies on the Production of Glycolipide by *Pseudomonas aeruginosa*. George Hauser and Manfred L. Karnovsky 645
The Structure of the Adenosine Triphosphate of *Thiobacillus thiooxidans*. H. A. Barker and Arthur Kornberg 655
The Genetic Control of Galactose Utilization in Saccharomyces. H. C. Douglas and Frances Condie 662
Studies on the Growth of *Histoplasma capsulatum*. I. Growth of the Yeast Phase in Liquid Media. Leo Pine 671
Nutrition and Metabolism of Marine Bacteria. I. Survey of Nutritional Requirements. Robert A. MacLeod, Eva Onofrey, and Margaret E. Norris 680
The Amino Acid Nutrition of Yeast in Relationship to Biotin Deficiency. A. G. Moat and E. K. Emmons 687
Amino Acid Metabolic Studies. VII. The Utilization of Amino Acids by *Streptococcus faecalis* Under Serine Imbalance. Thomas A. McCoy, Manford K. Patterson, Jr., Lawrence E. McClure, and Ken L. Grist 691
Electron Microscope Studies of Pleuropneumonialike Organisms Isolated from Man and Chickens. Harry E. Morton, James G. Leece, John J. Oskay, and Nettie H. Coy 697
Inhibition of a Staphylococcal Hemolysin by a Soluble Substance Produced by a Nonhemolytic Micrococcus Species. Pinghui Liu 718
Morphology of Vesicular Stomatitis Virus. T. L. Chow, Fu Ho Chow, and R. P. Hanson. 724
The Metabolism of Purines in *Aerobacter aerogenes*: A Study of Purineless Mutants. Marcus S. Brooke and Boris Magasanik 727
A New Fermentative Pseudomonad, *Pseudomonas formicans*, n. sp. Irving P. Crawford 734
Use of Sorbic Acid Enrichment Media for Species of *Clostridium*. George K. York, II and Reese H. Vaughn 739
A Study of the Location of Adsorbed Mercuric Ions in *Escherichia coli*. John O. Harris, A. Eisenstark, and R. Dean Dragsdorf 745
Carbon Dioxide Utilization by Rumen Microorganisms. C. N. Huhtanen, F. J. Carleton, and H. R. Roberts 749

Notes:
Induced Filament Formation and Color Variations in a Strain of *Serratia marcescens*. Richard Ehrlich 752
A Comparison of the Effectiveness of Certain Antibiotics on Streptococcus Infection of Mice. E. J. Foley 754
Synergistic Effects Between Soluble and Particulate Preparations from *Escherichia coli*. H. Earle Swim and Howard Gest 755
A Culture of *Escherichia freundii* Serologically Related to the Genus *Salmonella*. P. R. Edwards, Alma C. McWhorter, Justine McCurdy, and R. Davis 756
Index of Authors 759
Index of Subjects 762

INDEX OF SUBJECTS[1]

Acetate formation from carbon dioxide by *Butyribacterium rettgeri*, mechanism of, 216
—, inhibition of glycolipide production in *Pseudomonas aeruginosa* by, 645
— metabolism in *Escherichia coli*, influence of environment on, 140
—, oxidation of, by *Saccharomyces cerevisiae*, 110
Acetoacetyl-coenzyme A, effect of H_2O_2 on fission of, 61
Acetobacter capsulatum, response of, to lactone moiety of pantothenic acid, 279
— *melanogenum*, maltose oxidation by, 368
— *pasteurianum*, response of, to lactone moiety of pantothenic acid, 279
— *subozydans*, response of, to lactone moiety of pantothenic acid, 279
— *viscosum*, response of, to lactone moiety of pantothenic acid, 279
Acetoin, antibacterial properties of, 622
Achromobacter xerosis, spec. nov., characteristics of, 10
Acriflavin, inhibition of cell division by, 637
Adenosine-5′-triphosphate, presence of in *Thiobacillus thiooxidans*, 655
— — — structure of, from *Thiobacillus thiooxidans*, 655
Aeration requirements for growth of microorganisms, 346
Aerobacter aerogenes, excretion of orotic acid by mutants of, 534
— — volutin production in, 450
Agglutination of ion exchange resin particles coated with polysaccharide, 130
α-Alanine, effect of, on population changes in cultures of brucella, 562
β-Alanine, pantothenic acid synthesis from, 570
Alanine racemase, independence of spore germination from, 393
Alcohol dehydrogenase from *Leuconostoc mesenteroides*, 252
Aldolase in extracts of *Pseudomonas aeruginosa*, 77
Allantoin degradation by a pseudomonad, 598
Amino acid metabolism of treponemata, 493
— — nutrition of yeast in relation to biotin deficiency, 687
— — requirements of *Micrococcus pyogenes*, 617
— acids, utilization of, by *Streptococcus faecalis* under serine imbalance, 691
Ammonium dehydrogenase in *Bacillus subtilis*, 129
Anthrax, immunity in, 474
Antibiotics, effect of, on streptococcal infections in mice, 754
Antigen-antibody reactions, use of paper chromatograms to demonstrate, 160
Ascorbic acid, antibacterial properties of, 622
Assay media, effects of potassium and sodium in, 103
Azotobacter agile, Feulgen reaction in, 483
— *vinelandii*, succinic dehydrogenase of, 555

Bacillus anthracis, nutrition of, 474
— —, protective antigen of, 474
— *cereus*, alanine racemase in, 393
— —, heat resistant catalase from spores of, 334
— —, studies on germinating spores of, 464
— *globigii*, alanine racemase in, 393
— *megaterium*, alanine racemase in, 393
— —, effect of, on properties of a bacterial virus, 274
— —, Feulgen reaction in, 483
— —, studies on germinating spores of, 464
— *pasteurii*, urease from, purification and properties of, 67
— *polymyxa*, alanine racemase in, 393
— *stearothermophilus*, growth of at 36 C, 505
— —, use of, in studies on potential hazards of laboratory techniques, 541, 545
— *subtilis*, absence of kynureninase in, 577
— —, — — tryptophan-niacin relationship in, 577
— —, alanine racemase in, 393
— —, ammonium dehydrogenase in, 129
— —, metabolic patterns of, 437
— —, production of glutamyl polypeptide by, 302
— *terminalis*, alanine racemase in, 393
— —, heat resistant catalase from spores of, 334
Bacteriophage active against corynebacteria, 316
—, coli T2, abortive infection of *Escherichia coli* by, 36
—, effect of host on properties of a, 274
—, photodynamic inactivation of, 122
— T2 infection of *Escherichia coli*, induction of thymine synthesis by, 80
— —, reversible inhibition of, 430
—, use of, in studies on potential hazards of laboratory techniques, 549
Bacteriophages active against *Serratia marcescens*, 320
—, classification of, 320
—, properties of coli-dysentery, 320
—, T1 and T2, quantum yields for inactivation of, by ultraviolet, 210
Biotin, amino acid nutrition of yeast in relation to, 687

[1] All entries indexed to first page of articles.

— and succinate decarboxylation, 131
Bodies, intracellular, in *Caulobacter vibrioides*, 498
Bovine cervix, *Listeria monocytogenes* from, 634
Brucella abortus, CO_2 requirements and nucleic acid synthesis by, 74
— —, effect of α-alanine on population changes in cultures of, 562
— —, pantothenic acid synthesis by, 570
— —, reduction of nitrate by, 63
— —, use of paper chromatograms to demonstrate agglutinins for, 160
— *melitensis*, reduction of nitrate by, 63
— *suis*, effect of α-alanine on population changes in cultures of, 562
— —, reduction of nitrate by, 63
Butyribacterium rettgeri, acetate formation from carbon dioxide by, mechanism of, 216
— —, metabolism of glucose by, 227

Candida chalmersi, imperfect form of *Endomycopsis ohmeri*, 594
— *guilliermondii*, mating type of, 594
— *melibiosi*, synonym of *C. guilliermondii*, 594
— *membranaefaciens* nov. comb., characteristics of, 594
Capric acid, oxidation of, by *Serratia marcescens*, 585
Caproic acid, metabolism of, by *Clostridium kluyveri*, 329
Carbamates, metabolism of, 1, 5
Carbohydrates, effect of, on thermal death time of *Clostridium sporogenes*, 338
Carbon assimilation patterns of yeasts, 28
— dioxide requirement of group F streptococcus, 282
— — requirements and nucleic acid synthesis by *Brucella abortus*, 74
— — utilization by rumen microorganisms, 749
Catalase, activity of, in spores of *Bacillus terminalis*, 334
Caulobacter vibrioides, characteristics of, 194, 201
— —, cytology of, 201
— —, intracellular bodies in, 498
— —, nutrition of, 201
Cell division, inhibition of, by chemicals, 637
— permeability and citrate metabolism, 505
Cephalosporium salmosynnematum, nutrition of, 444
Chemosynthesis and phosphorylation by *Thiobacillus thiooxidans*, 93
Chloramphenicol, precursors stimulating synthesis of, 243
Chlortetracycline, effect of, on streptococcal infections in mice, 754
Chromatin, duplication of bacterial, 464
Citrate, breakdown of, in absence of coenzyme A, 19
— metabolism and cell permeability, 505
Citrogenase, activity of, in *Escherichia coli*, 140
Clostridium acetobutylicum, sorbic acid medium for growth of, 739
— *aerofoetidum*, sorbic acid medium for growth of, 739
— *bifermentans*, sorbic acid medium for growth of, 739
— *botulinum*, sorbic acid medium for growth of, 739
— *butyricum*, sorbic acid medium for growth of, 739
— *carnis*, sorbic acid medium for growth of, 739
— *felsineum*, sorbic acid medium for growth of, 739
— *histolyticum*, sorbic acid medium for growth of, 739
— *kluyveri*, β-keto acid metabolism by, 329
— —, production of hydrogen peroxide by, 61
— *lentoputrescens*, sorbic acid medium for growth of, 739
— *nigrificans*, sorbic acid medium for growth of, 739
— *novyi*, sorbic acid medium for growth of, 739
— *parabotulinum*, sorbic acid medium for growth of, 739
— *perfringens*, sorbic acid medium for growth of, 739
— *septicum*, sorbic acid medium for growth of, 739
— *sporogenes*, factors involved in heat resistance of, 338
— —, sorbic acid medium for growth of, 739
— —, thermal death time of, 338
— *tartarivorum*, sorbic acid medium for growth of, 739
— *tertium*, sorbic acid medium for growth of, 739
— *tetani*, sorbic acid medium for growth of, 739
— *tetanomorphum*, sorbic acid medium for growth of, 739
Cobalt tolerant culture of *Saccharomyces cerevisiae*, 167
Coenzyme A, breakdown of citrate in absence of, 19
Coli-dysentery bacteriophages, properties of, 320
Coliphage, photodynamic inactivation of, 122
— T2, abortive infection of *Escherichia coli* by, 36
— — infection of *Escherichia coli*, induction of thymine synthesis by, 80
— —, nutritional requirements for reproduction of, 43
Coliphages T1 and T2, quantum yields for inactivation of, by ultraviolet, 210
Color variation, induced, in *Serratia marcescens*, 752

Corynebacterium diphtheriae, bacteriophage active against, 316
— species of marine origin, nutrition of, 680
Cryptococcus difluens, carbon assimilation by, 28
— *laurentii*, carbon assimilation by, 28
— *parapsilosis*, carbon assimilation by, 28
1,2-Cyclohexanedione, antibacterial properties of, 622
Cystathionine, metabolism of, by *Escherichia coli*, 293
Cysteine, metabolism of, by *Escherichia coli*, 293
Cytochrome oxidase in *Bacillus subtilis*, 437

Desoxyribonucleic acid content of bacterial spores, 464
Diacetyl, antibacterial properties of, 622
Diazouracil, inhibition of cell division by, 637
Diethyl sulfate, inhibition of cell division by, 637
Dihydroxyacetone, antibacterial properties of, 622
Diphtheria-like corynebacteria, bacteriophages active against, 316
Dye, primary, in gram stain, cytological basis for, 509

Electron micrograph of vesicular stomatitis virus, 724
— micrographs of adsorbed mercuric ions in *Escherichia coli*, 745
— — — *Erwinia amylovora*, 507
— — — pleuropneumonia-like organisms, 697
Endomycopsis guilliermondii nom. nov., perfect form of *Candida guilliermondii*, 594
— *ohmeri*, imperfect type of, 594
Enzyme synthesis in *Escherichia coli*, 419
Erwinia amylovora, effect of streptomycin on morphology of, 507
— —, electron micrographs of, 507
Erysipelothrix rhusiopathiae, medium for cultivation of, 258
Escherichia coli, abortive infection of, by coliphage T2, 36
— —, absence of kynureninase in, 577
— —, — — tryptophan-niacin relationship in, 577
— —, bacteriophage T2 infection of, induction of thymine synthesis by, 80
— — bacteriophages T1 and T2, quantum yields for inactivation of, by ultraviolet, 210
— —, degradation of penicillin by, 610
— —, effect of ascorbic acid on, 622
— —, — — chemicals on division and growth of, 637
— —, — — sound fields on, 373
— —, Feulgen reaction in, 483
— —, influence of environment on acetate metabolism in, 140
— —, inhibition of growth of, with 5-methyltryptophan, 152
— —, location of adsorbed mercuric ions in, 745
— —, metabolism of cystathionine by, 293
— —, — — homocysteine by, 293
— —, — — homoserine by, 293
— —, — — threonine by, 293
— —, methionine biosynthesis in, 293
— —, nutrition of a thymine requiring mutant of, 80
— —, — —, for reproduction of coliphage T2, 43
— —, relationship of potassium to purine biosynthesis in, 186
— —, staining of nucleoproteins in, 237
— —, synergism between soluble and particulate preparations from, 755
— —, synthesis of β-galactosidase in, 419
— *freundii*, serological relation of, to genus *Salmonella*, 756
Ethyl carbamate (urethan), metabolism of, 5
Ethylenediamine tetraacetic acid, effect of, on growth of *Shigella dysenteriae*, 604
Ethylenimine, inhibition of cell division by, 637
Ethyl-N-ethyl carbamate, metabolism of, 5
— — —, metabolism of, 5

Fatty acids, oxidation of, by *Serratia marcescens*, 585
— —, utilization of, by *Mucor mucedo*, 24
Feulgen reaction in bacteria, 483
Filament formation in *Serratia marcescens*, 752
Fixation of nitrogen by methane bacteria, 589
Flavobacterium aquatile, nutrition of, 326
— *esteroaromaticum*, nutrition of, 326
— species of marine origin, nutrition of, 680
— *suaveolens*, nutrition of, 326
Fungi, occurrence of, in soil, 156

Galactose utilization in Saccharomyces, genetic control of, 622
β-Galactosidase, synthesis of, in *Escherichia coli*, 419
Genetic studies of respiration deficiency in yeast, 391
Glucose, alternate pathways for oxidation of, by *Pseudomonas aeruginosa*, 77
—, metabolism of, by *Butyribacterium rettgeri*, 227
—, oxidation of, by *Saccharomyces cerevisiae*, 110
Glutamic acid dehydrogenase, presence of, in treponemata, 493
— — requirements of *Lactobacillus arabinosus*, replacement of, with isoglutamine, 98
Glutamyl polypeptide, production of, by *Bacillus subtilis*, 307
Glycolipide, production of, by *Pseudomonas aeruginosa*, 645
Gram stain, cytological basis for role of primary dye in, 509
Growth factor, lipoprotein, for pleuropneumonia-like organisms, 627

Hansenula capsulata, carbon assimilation by, 28
— *saturnus*, carbon assimilation by, 28
Hemolysin, staphylococcal, inhibition of, by substance from micrococci, 718
Hexokinase in extracts of *Pseudomonas aeruginosa*, 77
Histoplasma capsulatum, growth of yeast phase of, 671
— —, occurrence of, in soil, 156
— —, sporulation of, 261
Homocysteine, metabolism of, by *Escherichia coli*, 293
Homoserine, metabolism of, by *Escherichia coli*, 293
Host, effect of, on properties of a bacterial virus, 274
Hydrogen metabolism in *Micrococcus aerogenes*, 351
— peroxide, production of, by *Clostridium kluyveri*, 61
Hydrogenase in *Micrococcus aerogenes*, 351

Immunity in anthrax, 474
Individual microbes, method for isolating, 258
Indole, effect of, on bacterial growth, 152
"Inducer", role of in the synthesis of maltase in yeast, 265
Infectious hazards of laboratory techniques, 541, 545, 549
Influenza B virus lesions in mice, suppression of, by xerosin, 10
Inosose, antibacterial properties of, 622
Ionic concentration, effects of, on growth of bacteria, 299
Isoglutamine and growth of *Lactobacillus arabinosus*, 98

Jensenia canicruria, utilization of carbon compounds by, 231

β-Keto acid metabolism by *Clostridium kluyveri*, 329
Kloeckera africana, carbon assimilation by, 28
Kynureninase, absence of, in *Escherichia coli* and *Bacillus subtilis*, 577

Laboratory techniques, infectious hazards of, 541, 545, 549
Lactobacillus arabinosus, isoglutamine and growth of, 98
— *casei*, effects of ionic concentration on growth of, 299
— *fermentum*, effects of ionic concentration on growth of, 299
— *leichmannii*, effects of ionic concentration on growth of, 299
— *plantarum*, inhibition of growth of, with 5-methyltryptophan, 152
Lactone moiety of pantothenic acid, response of Acetobacter species to, 279
Leuconostoc dextranicum, nutrition of, 135
— —, synthesis of polysaccharide by, 135
— *mesenteroides*, alcohol dehydrogenase from, 252
— —, studies on sucrose phosphorylase from, 381
L form of *Proteus mirabilis*, reversion of, 89
Lipolytic activity of *Mucor mucedo*, 24
Lipomyces starkeyi, carbon assimilation by, 28
Lipoprotein, growth factor for pleuropneumonia-like organisms, 627
Listeria monocytogenes from bovine cervix, 634
L-type colonies of Proteus, a synthetic medium for, 530
Lyophilization, infectious hazards of, 541, 545
Lysozyme and its relation to Nakamura effect, 302
—, effect of, on morphology of *Micrococcus lysodeikticus*, 171

Maltase, role of the inducer in the synthesis of, 265
Maltose oxidation by *Acetobacter melanogenum*, 368
Manganese, effect of, on autolysis of *Streptococcus faecalis*, 362
Marine bacteria, nutrition of, 680
Mating types of *Candida chalmersi*, 594
— — — — *guilliermondii*, 594
— — — — *melibiosi*, 594
— — — *Endomycopsis ohmeri*, 594
Mercuric ions, location of adsorbed, in *Escherichia coli*, 745
Metabolism of *Bacillus subtilis*, 437
Methane bacteria, fixation of nitrogen by, 589
Methanobacterium omelianskii, fixation of nitrogen by, 589
Methionine biosynthesis in *Escherichia coli*, 293
Methyl-*bis* (β-chloroethyl) amine, inhibition of cell-division by, 637
α-Methyl glucoside, role of, in the synthesis of maltase in *Saccharomyces cerevisiae*, 265
Methylene blue, photodynamic action of, on coliphage T2, 122
5-Methyltryptophan, inhibition of bacterial growth with, 152
Micrococcus aerogenes, hydrogenase in, 351
— *lysodeikticus*, effect of lysozyme on morphology of, 171
— —, lysozyme in, 302
— *pyogenes*, amino acid requirements of, 617
— *varians*, effect of sound fields on, 373
Microsporum gypseum, occurrence of, in soil, 156
Minute colony G streptococcus, carbon dioxide requirements of, 282
Mitosis in spores of bacilli, 464
Mitotic cycle in yeast nucleus, 514

Miyagawanella bronchopneumoniae, lesions in mice caused by, suppression of, by xerosin, 10
Mouse pneumonitis virus lesions in mice, suppression of, by xerosin, 10
Mucor mucedo, lipolytic activity of, 24
Mutant of *Salmonella typhosa*, virulence of, 117
Mutants of *Aerobacter aerogenes*, excretion of orotic acid by, 534
— — *Brucella abortus*, α-alanine and formation of, 562
— — *Mycobacterium tuberculosis*, induced metabolic, 592
Mycobacterium phlei, effect of ascorbic acid on, 622
—*tuberculosis*, effect of ascorbic acid on, 622
— —, effects of tricarboxylic acid cycle intermediates on metabolism of, 405
— —, induced metabolic mutants of, 592
— —, metabolism of, 405, 411
— —, terminal respiration of, 411
Mycoplana species of marine origin, nutrition of, 680

Nakamura effect, lysozyme and its relation to, 302
Necrology of Harry Luman Russell (1866–1954), 133
Niacin-tryptophan relationship, absence of, in *Escherichia coli* and *Bacillus subtilis*, 577
Nicotinamide, effect of, on growth of *Shigella dysenteriae*, 604
Nicotinic acid-tryptophan relationship, absence of, in *Escherichia coli* and *Bacillus subtilis*, 577
Nitrate, reduction of by brucellae, 63
—, — —, with hydrogen, by *Proteus vulgaris*, 53
Nitrification of urethan by *Streptomyces nitrificans*, 5
Nitrite, toxicity of, for *Brucella melitensis*, 63
Nitrogen assimilation by *Pseudomonas aeruginosa*, effect of sulfur compounds on, 289
—, fixation of, by methane bacteria, 589
5-Nitro-7-hydroxybenzotriazole, inhibition of cell division by, 637
Nocardia aquosus, utilization of carbon compounds by, 231
— *asteroides*, utilization of carbon compounds by, 231
— *blackwellii*, utilization of carbon compounds by, 231
— *caprae*, utilization of carbon compounds by, 231
— *caviae*, utilization of carbon compounds by, 231
— *convoluta*, utilization of carbon compounds by, 231
— *cuniculi*, utilization of carbon compounds by, 231
— *erythropolis*, utilization of carbon compounds by, 231
— *globerula*, utilization of carbon compounds by, 231
— *leishmanii*, utilization of carbon compounds by, 231
— *opaca*, utilization of carbon compounds by, 231
— *rangoonensis*, utilization of carbon compounds by, 231
— *rubra*, utilization of carbon compounds by, 231
— *sylvodorifera*, utilization of carbon compounds by, 231
Nucleic acid synthesis and CO_2 requirements of *Brucella abortus*, 74
Nucleoproteins in *Escherichia coli*, staining of, 237
5′-Nucleotidase from a soil bacterium, 128
Nucleus of Saccharomyces, 514
Nutrition of a thymine requiring mutant of *Escherichia coli*, 80
— — *Caulobacter vibrioides*, 201
— — *Cephalosporium salmosynnematum*, 444
— — *Flavobacterium aquatile*, 326
— — — *esteroaromaticum*, 326
— — — *suaveolens*, 326
— — *Lactobacillus arabinosus*, 98
— — *Leuconostoc dextranicum*, 135
— — marine bacteria, 680
— — *Micrococcus pyogenes*, 617
— — penicillin sensitive *Sarcina lutea*, 390
— — pleuropneumonia-like organisms, 627
— — *Proteus mirabilis*, 530
— — *Shigella dysenteriae*, 604
— — *Streptococcus faecalis*, 691
Nutritional requirements of coliphage T2, 43

Obituary of Harry Luman Russell (1866–1954), 133
Oleic acid, utilization of, by *Mucor mucedo*, 24
Orotic acid, excretion of, by mutants of *Aerobacter aerogenes*, 534
Orotic acid fermenting bacterium, *Zymobacterium oroticum*, 400
Oxytetracycline, effect of, on streptococcal infections in mice, 754

Pantolactone, response of acetobacter to, 279
Pantothenic acid, effect of potassium and sodium on assay of, 103
— —, lactone moiety of, response of acetobacter to, 279
— — synthesis by *Brucella abortus*, 570
Pantoyl lactone, pantothenic acid synthesis from, 570
Paper chromatograms, use of, to demonstrate antigen-antibody reactions, 160
Paracolon organisms with antigen of *Shigella sonnei*, 50
Pasteurella pestis, adaptive control of terminal respiration in, 146
— —, metabolism of aerobic cells of, 146, 178
— —, metabolism of anaerobic cells of, 146, 178
— —, production of toxin by, 57

— *tularensis*, use of paper chromatograms to demonstrate agglutinins for, 160
Penicillin, degradation of, by bacteria, 610
—, effect of, on streptococcal infections in mice, 754
— resistance, multiple mechanism of, 610
— resistant *Micrococcus pyogenes*, amino acid requirements of, 617
— sensitive *Micrococcus pyogenes*, amino acid requirements of, 617
— — *Sarcina lutea*, nutrition of, 390
Penicillinase in *Micrococcus pyogenes*, 617
—, presence of, in bacteria, 610
1-Phenyl-1,2-propanedione, antibacterial properties of, 622
Phosphorylase, studies with sucrose, 381
Phosphorylation and chemosynthesis by *Thiobacillus thiooxidans*, 93
Photodynamic action of methylene blue on coliphage T2, 122
Pichia membranaefaciens, carbon assimilation by, 28
Plague toxin, production and purification of, 57
Pleuropneumonia-like organisms, electron micrographs of, 697
— — —, nutrition of, 627
Polysaccharide, synthesis of, by *Leuconostoc dextranicum*, 135
Potassium, effect of, in microbiological assay media, 103
—, relationship of, to purine biosynthesis in *Escherichia coli*, 186
Proactinomyces agnosus, utilization of carbon compounds by, 231
— *asteroides* var. *crateriformis*, utilization of carbon compounds by, 231
— *polychromogenes*, utilization of carbon compounds by, 231
— *pseudomadurae*, utilization of carbon compounds by, 231
— *restrictus*, utilization of carbon compounds by, 231
— *ruber*, utilization of carbon compounds by, 231
β-Propiolactone, inhibition of cell division by, 637
Propionibacterium pentosaceum, biotin and succinate decarboxylation by, 131
Proteins, effect of, on thermal death time of *Clostridium sporogenes*, 338
Proteus mirabilis, L-type colonies of, 530
— —, reversion of L form of, 89
— *morganii*, degradation of penicillin by, 610
— *vulgaris*, reduction of nitrate with hydrogen by, 53
Pseudomonas aeruginosa, alternate pathways for oxidation of glucose by, 77
— —, effect of sound fields on, 373
— —, — — sulfur compounds on nitrogen assimilation by, 289
— —, glycolipide production by, 645
— *formicans*, n.sp., characteristics of, 734
— *putrefaciens*, studies on sucrose phosphorylase from, 381
— *saccharophila*, studies on sucrose phosphorylase from, 381
— species, degradation of allantoin by, 598
Purine biosynthesis in *Escherichia coli*, relationship of potassium to, 186

Quantum yields for inactivation of coliphages T1 and T2 by ultraviolet, 210

Racemase, independence of spore germination from alanine, 393
Reiter treponeme, amino acid metabolism of, 493
Replica plating technique, use in study of carbon assimilation by yeasts, 28
Resin particles coated with polysaccharide, agglutination of, 130
Respiration deficiency in yeast, genetic studies of, 391
Rumen microorganisms, carbon dioxide utilization by, 749
Russell, Harry Luman (1866–1954), necrology of, 133

Saccharomyces bisporus, carbon assimilation by, 28
— *cerevisiae*, amino acid nutrition of, in relation to biotin deficiency, 687
— —, carbon assimilation by, 28
— —, cobalt tolerant culture of, 167
— —, effect of chemicals on growth and division of, 637
— —, — — sound fields on, 373
— —, nutrition of, 687
— —, oxidation of glucose and acetate by, 110
— —, role of the inducer in the synthesis of maltase in, 265
— *fragilis*, carbon assimilation by, 28
—, mitotic cycle in nucleus of, 514
— *pastori*, carbon assimilation by, 28
— species, genetic control of galactose utilization in, 662
Saccharomycodes ludwigii, carbon assimilation by, 28
Salmonella genus, serological relation of *Escherichia freundii* to, 756
— *papuana*, an induced 6,8 form from, 259
— *typhosa*, use of paper chromatography to demonstrate agglutinins for, 160
— —, virulence of a naturally occurring mutant of, 117
Salt, effect of, on growth of bacteria, 299
Sarcina lutea, nutrition of penicillin sensitive, 390
Serine imbalance, utilization of amino acids by *Streptococcus faecalis* under, 691
Serological identification of hemolytic streptococci, 207
Serology of *Escherichia freundii*, 756

Serratia indica, use of, in studies on potential hazards of laboratory techniques, 541, 545
— *marcescens*, aeration requirements for growth of, 346
— —, bacteriophages active against, 320
— —, effect of sound fields on, 373
— —, induced filament formation and color variations in, 752
— —, oxidation of capric acid by, 585
Shigella dysenteriae, nutrition of, 604
— *flexneri*, bacteriophages active against, 320
— *paradysenteriae*, degradation of penicillin by, 610
— *sonnei*, bacteriophages active against, 320
— —, paracolon organisms with antigen of, 50
Sodium chloride, effect of, on growth of bacteria, 299
—, effect of, in microbiological assay media, 103
Soil, occurrence of *Histoplasma capsulatum* and *Microsporum gypseum* in, 156
Sorbic acid enrichment media for clostridia, 739
Sound fields, exposure of microorganisms to measured, 373
Spore germination, studies on, 393
Spores, chromatin in bacterial, 464
— of *Bacillus terminalis*, heat resistant catalase from, 334
— — Streptomycetaceae, staining of, 389
Sporulation of *Histoplasma capsulatum*, 261
Staining of nucleoproteins in *Escherichia coli*, 237
Staphylococcal hemolysin, inhibition of, by substance from micrococci, 718
Stearic acid, utilization of, by *Mucor mucedo*, 24
Streptococcal infections in mice, effect of antibiotics on, 754
Streptococci, hemolytic, serological identification of, 207
Streptococcus faecalis, amino acid utilization of, under serine imbalance, 691
— —, effect of manganese on autolysis of, 362
— —, effects of ionic concentration on growth of, 299
— —, nutrition of, 691
—, group F, carbon dioxide requirement of, 282
Streptomyces fradiae, staining spores of, 389
— *griseus*, staining spores of, 389
— *lavendulae*, staining spores of, 389
— *nitrificans*, spec. nov., characteristics of, 1
— *venezuelae*, staining spores of, 389
— —, synthesis of chloramphenicol by, 243
Streptomycetaceae, staining spores of, 389
Streptomycin, effect of, on morphology of bacteria, 507
—, — —, — streptococcal infection in mice, 754
Succinate decarboxylation and biotin, 131
Succinic dehydrogenase of *Azotobacter vinelandii*, 555
Sucrose phosphorylase, studies with, 381
Sulfur compounds, effect of, on nitrogen assimilation by *Pseudomonas aeruginosa*, 289
Synergism between soluble and particulate preparations from, 755

Thermal death time of *Clostridium sporogenes*, 338
Thiobacillus thiooxidans, phosphorylation and chemosynthesis by, 93
— —, structure of adenosine triphosphate from, 655
Threonine, metabolism of, by *Escherichia coli*, 293
Thymine requiring mutant of *Escherichia coli*, nutrition of, 80
— synthesis, induction of, by bacteriophage T2 infection of *Escherichia coli*, 80
Torulopsis aeria, carbon assimilation by, 28
— *candida*, carbon assimilation by, 28
— *gropengiesseri*, carbon assimilation by, 28
— *pinus* var. *lactosa*, carbon assimilation by, 28
Toxin, plague, production and purification of, 57
Treponemata, amino acid metabolism of, 493
Tricarboxylic acid cycle, operation of in *Mycobacterium tuberculosis*, 405, 411
2,4,6-Trichlorophenol, effect of, on oxidation of caprate by *Serratia marcescens*, 585
Triethylenemelamine, inhibition of cell division by, 637
Triosephosphate dehydrogenase in extracts of *Pseudomonas aeruginosa*, 77
Triphenylmethane dyes, use of, in gram stain, 509
Triphosphopyridine nucleotide dependent alcohol dehydrogenase from *Leuconostoc mesenteroides*, 252
Tryptophan-niacin relationship, absence of, in *Escherichia coli* and *Bacillus subtilis*, 577

Ultraviolet, quantum yields for inactivation of T1 and T2 *Escherichia coli* bacteriophages by, 210
Urease, bacterial, purification and properties of, 67
Urethan, metabolism of, 1, 5

Valeric acid, metabolism of, by *Clostridium kluyveri*, 329
Variant of *Leuconostoc dextranicum*, synthesis of polysaccharide by, 135
Vesicular stomatitis virus, electron micrograph of, 724
— — —, morphology of, 724
Viral techniques, infectious hazards of, 549
Virulence of a naturally occurring mutant of *Salmonella typhosa*, 117
Volutin production in *Aerobacter aerogenes*, 450

Xerosin, a microbial product from *Achromobacter xerosis*, spec. nov., 10
—, suppression of viral lesions in mice by, 10

Yeast, amino acid nutrition of, in relation to biotin deficiency, 687
—, effect of chemicals on division and growth of, 637
—, genetic control of galactose utilization in, 662
—, — studies of respiration deficiency in, 391
— nucleus, mitotic cycle in, 514
— phase of *Histoplasma capsulatum*, growth of, 671
Yeasts, carbon assimilation patterns of, 28

Zymobacterium oroticum, nov. gen., nov. spec., characteristics of, 400
